

Site-First SEO Free – Documentation & Onboarding Guide

Introduction

Site-First SEO is a lightweight, powerful WordPress plugin designed to improve your website's visibility without relying on external APIs or bloated toolkits. By analyzing your content directly on-site, it gives you actionable insights to optimize your SEO workflow faster and more effectively.

Installation

1. Log in to your WordPress dashboard.
2. Navigate to Plugins → Add New.
3. Search for Site-First SEO.
4. Click Install Now, then Activate.

Features Overview

- On-site content audit (pages & posts)
- Keyword density and readability checks
- Internal link suggestions
- Auto-generated sitemap
- 404 error monitoring and basic redirects
- Lightweight, no external API calls

Troubleshooting

- Plugin won't activate? Ensure you're running PHP 7.4+ and WordPress 5.6+.
- Reports not generating? Make sure WordPress cron jobs are enabled.
- Still stuck? Contact support via your account dashboard.
